# Real Quiet

Allowing a safe and deep sleep

- The DM28 produces a noise level of only 28dB±2.
- We utilize exclusive technology to reduce noise, resulting in an operation as quiet as breathing

# Smart Data Management

Remote data process engine providing additional value to users.

- Close-loop healthcare from diagnosis to therapy.
- Physicians are able to browse the physiological data and statistical result remotely, which help to make further therapy decision.
- Data analysis based on cross-device and multi-parameter with more vital signs enhances the reliability of physical interpretation.

# 5 Inch Touch Screen

Enabling Intuitive display and efficient interactions.

- The device presents respiratory trend graphics and waveform on a large 5-inch screen.
- The integrated design showcases sophistication and elegance.
- It's designed to be elderly-friendly with its enlarged screen display.
