High-Frequency Electrocautery

Scope of application

It is applicable to the disease of dermatology, archos-bowels, gynecology and ophthalmology Dept. such as condyloma acuminate, flat wart, plantar wart, verruca vulgaris, ephelides, adenoma sebaceum, internal hemorrhoid, external hemorrhoid, cervical erosion, Na-cyst, cervical polyp, nympha cyst, chronic hypertrophic rhinitis, nasal polyps and nasal cavity angioneoplasm, etc.

Function Features

- Import integral circuit and control chip to ensure the normal application of the apparatus.
- Spherical electrodes, needle-shape electrodes, wire electrode and knife-shape electrodes, easily-used operating handles, excellent quality.
- Integrating several new technologies to ensure the integral features of quick startup, high efficiency, long-fire life and stability.
- New technology related to switching power supply to save the necessity of external AC voltage stabilizer; normal application is enabled to area with unstable power supply(198V～242V).

Technical parameters

- Working mode: ionization, blood clotting, mixing cut
- Operation style: To press correspondence button to convert according to treating needs
- Power supply: a.c.220V±22V，50MHz±1MHz
- Working frequency: 1.27MHz ±10%
- Output power: mixing cut: 40W±20%, blood clotting: 30W±20%, ionization: 15W±20%
- Power indication: 165VA
- Handle quantity of treatment: one
