

technical specifications

Imaging Modalities	Multi-COLOR(Red、Green、 Blue) Infrared (IR)、 Red-Free(RF) Fundus Autofluorescence FAF (B-AF、 G-AF)
Field of View (eye center)	One shot single capture Optical zoom 135° WA / 90° HD / 45° UHD
Automatic Montage	Up to 240° mosaic 2 to 9 images
Non Mydriatic	Minimum pupil 2mm
Resolution	5 microns
Fixation Targets	Internal movable fixation target External flexible target
Diopter Compensation	-35D / +50D
Software Included	Patient management Retina review and annotation Multiple review stations DICOM compatible
* Retina Assistant	20 pathologies detection Offline, no internet requiried Unlimited license use
* Cells and blood flow tools	8° high magnification image Cone density count Blood velocity measurement
Hardware Included	PC computer Monitor Table (printer)
Power	Voltage: 100-240V~50-60Hz

*Optional functions

China Care Medical Equipment Co.,Ltd

Room B101, ZhongBang Business Building,
PuXing Road No. 87, Tianhe, Guangzhou, China

CC25042902

Ultra-wide field

Color and Autofluorescence

2.0mm Pupil Size

Offline Retina Assistant

RGB Laser Imaging

RGB ultra widefield image is the combination of 3 confocal laser sources that provide **maximum fidelity** and **maximum contrast**

Blue and Green Autofluorescence

Fundus autofluorescence (AF) imaging is a rapid and noninvasive technique to evaluate retinal pigment epithelial (RPE) function, which includes Blue AF and Green AF.

CSC(Blue AF)

CSC(Green AF)

BRVO

AMD

Up to 240° view

Capture two to nine photos and combine in a panorama view easily thanks to the fast and precise joystick control

A perfect choice for Optometry setups, greatly reducing the rate of ungradable images in combination with a powerful software solution to support the evaluation process.

Retina Assistant

comes with a full featured review software, including the offline Retina Assistant, tools for comparison, measurements, annotations and export.

Unlimited use: no license required

Offline operation: works without internet

20 different eye pathologies detection

Lossless optical zoom

One click switch Field of View to zoom into areas of interest

45°UHD

90°HD

135°WA

Full power to focus on the big view or search for the details

RGB advanced optical zoom feature offers three levels of magnification, from ultra-wide field (UWF) for comprehensive retina views to ultra-high definition (UHD) for precise detail visualization, empowering operators to capture every aspect of retinal health with unparalleled precision and clarity.

With this versatile zoom capability, users can ensure no detail goes unnoticed, facilitating comprehensive diagnosis and monitoring of ocular conditions.

PUPIL($\geq 2\text{MM}$)

Optimal photos even on really small pupils resulting on higher success rate of gradable images

Strong Confocality is derived from the Scanning Laser Technology and allows to penetrate easily thought cataract and eye opacities and to take images even on pupil size of 2mm and under unfavorable light conditions.

CELL AND BLOOD FLOW TOOL

- Cone cell density
- The average diameter of Cone cell
- Red blood cell flow velocity
- Vascular wall thickness and diameter

LIVE IR PREVIEW

The operator interface displays a live infrared (IR) image, enabling users to capture optimal photos effortlessly with a comprehensive control interface that is both user-friendly and fully-featured, ensuring seamless operation for superior image quality.

DICOM CONNECTIVITY INCLUDED

Seamless integration with DICOM protocol, featuring built-in support for worklists, ensuring effortless integration into existing medical imaging systems.
