Digital Mammography System

It is your best choice for a cost-effective digital mammography system. It can achieve the most demanding workloads from everyday screening to follow-up studies. PBT medical's trusted technology promises good performance and quality results.

em

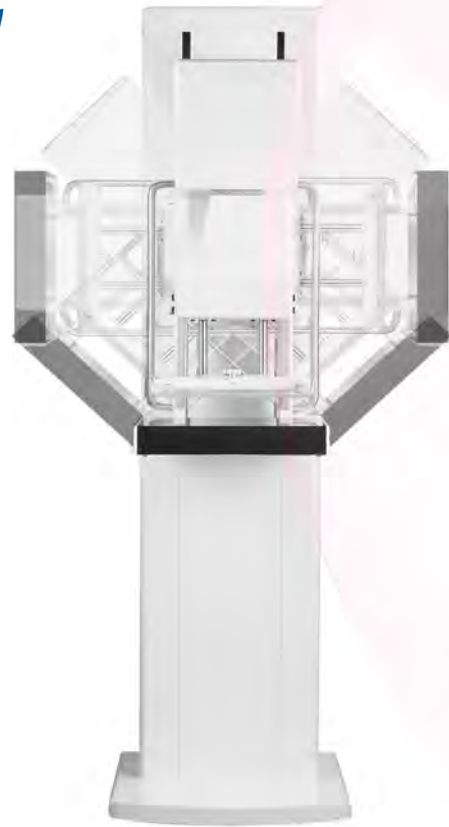

It is a safe choice for mammographic breast examinations. Its clever design makes it adapted to both hospital's large workflow screening and smaller clinics' demands. Owing to the compact steel structure, the system also adapts well to mobile installations.

User-friendly design

The metal structure frame is really suitable for long-distance transportation, and is also convenient for vehicle use. The paddle released automatically after exposure, and could be released manually at any time.

Reliable Quality

Our machine stands out from other mammography units with its integrated and extremely reliable quality. The US patent dry-type high-frequency generator produces efficient dual power to ensure constant imaging. The ripple-free output reduces glandular dose, eliminates retakes and extends the life span of the x-ray tube. All the effort and innovation are paid to perform the best quality mammography system to our customers.

About Us:

- Found in 1993; First company in China launches analog mammography machine in 1998.
- More than 28 years dedicated in manufacture of mammography system.
- Over 70+ patents and software copyrights.
- Over 1000+ hospitals worldwide choosing our product.
